Hodgson Portable Houses

Practical—Durable—Artistic

HTHE best of materials are used in their construction and the construction is right, as has been proved after years of use.

SIMPLICITY. The *Hodgson Portable Houses* are easily erected by unskilled labor with the aid of our "Special Key Bolts" that are tightened with one blow of a hammer, and when tightened the sections are absolutely secure. There are no nuts to rust or require a wrench to tighten.

RIGIDITY. The *Hodgson* construction does not depend entirely upon the key bolts to hold the sections together—they interlock in such a manner that little strain comes on any one part, making the house capable of withstanding the strongest winds and heaviest storms.

INTERIOR. The *Hodgson Portable Houses* are lined with a heavy waterproof fibre, making a beautiful interior, sanitary, washable, damp proof and odorless—absolutely wind proof, making a house that is easily heated in winter and cool in summer. (See page 32.)

DURABILITY. The *Hodgson Portable Houses* have a frame of Oregon Pine and Red Cedar, which is covered with a special Red Cedar Rabbeted Weather Boarding. The lumber is absolutely free from knots and defects, and with three coats of the very best oil paint makes a strong, light and durable construction that is found only in a *Hodgson Portable*.

THE ROOFS are made of Red Cedar Rabbeted Boarding, and the nails used in constructing them are galvanized. They are made in sections and thoroughly painted. We have used this roof construction for many years after experimenting extensively with all kinds of roofing materials, including canvas, galvanized iron and rubber or ready roofings, all of which are unsightly and not durable or practical for portable houses. We guarantee our roofs to be tight and to stay so for years.

THE FLOORS are strongly constructed of spruce joist covered with matched Southern Hard Pine, making a strong, durable floor, free from defects. The floors in all our houses are the same, and in our garages they easily stand up under the heaviest touring cars.

THE WINDOWS. We give you your choice of our sun parlor windows that open up the entire window (See page 34), or the regular double hung window—both absolutely storm proof and practical.

THE DOORS. The *Hodgson Portable Houses* have $1\frac{1}{2}$ inch panel or glass doors. The front door is fitted with Sargent's best three tumbler brass face locks and brass plates and knobs, and hung on brass finished hinges. The hardware throughout is of a quality found in the best residences.

HIGH QUALITY AND LOW COSTS. Our lumber is milled where it grows, and our connections with the largest Red Cedar mills enable us to buy at the very lowest market prices. It is supplied to us in a form that incurs absolutely no waste and reduces the cost to a minimum. It is put together by New England mechanics—well known to be the most thorough workmen to be found anywhere in the United States, yet whose wages are less than mechanics receive in other parts of the country.

Under these conditions we can produce better goods at a less cost than can be produced in any other state. It is far cheaper to ship our milled stock from the west as lumber than as portable houses, and our cost of manufacturing here is less than in any other part of the country, so that we know our prices are as low as a good, practical portable house can possibly be made for. We operate the largest exclusively portable house factory and carry the largest stock of highest grade materials.

We are backed up in our claims by the many re-orders we are constantly receiving from our customers of years' standing and the strongest endorsements that it would be possible to give any manufactured product—many of them from the best known people in the country.

The illustrations shown in this catalog are photographs of a few of the many portable houses we have supplied our satisfied customers and will give the reader a fair idea of their general appearance, although it is impossible for any illustration to do the houses justice—they should be seen to be appreciated.

AT OUR SHOW ROOMS, centrally located in *Boston*, can be seen samples of our goods, while at our factory, located in *Dover, Mass.*, a half hour's ride from Boston out of the South Station, can be seen many of our houses erected and in use. A visit to either place will fully repay anyone who is interested in Portable Houses.

E. F. HODGSON CO.

116 WASHINGTON STREET, BOSTON, MASS.
FACTORY: DOVER, MASS.

SIX YEARS OF EXTREME EXPOSURE

My Hodgson portable house has been up six years. The roof has been painted once each year; the sides and ends once every second year. Otherwise it has had no attention. It has not moved an inch since erection, and is as good today for all practical purposes as the day I received it. It stands at an altitude of 1,000 feet—30 feet from the edge of a cliff dropping 500 feet—exposed to very high winds and heavy rains, and to a temperature ranging from the heat of summer to 25 below zero in winter.

The snow is often six feet deep around it, and in the summer our heavy thunder storms bring with them floods of water. With the thermometer registering below zero outside, we have had a temperature of 75 degrees inside within thirty minutes after starting a fire in a sheet-iron upright stove, burning wood.

A feature of especial delight are the ventilators. The house has been closed for months at a time, and yet on opening it the air in the rooms has been found to be as sweet and pure as that out of doors. In the summer of 1908 it lay in the center of a hurricane that uprooted trees and unrooted houses in the vicinity, and we suffered no damage.

The pleasure my husband and I and our guests have derived from the use of our house at all times of the year cannot be exaggerated. The house is situated at Clear Lake, Putnam County, New York.

MRS. J. C. DARROW, 105 No. Division St., Peekskill, N. Y.

Our Exhibit at the Sportsmen's Show
Mechanics Building, Boston

SEVENTY MILE GALE

I can't tell you how pleased I am with our portable house which I purchased of you at the Sportsmen's Show. Standing at the end of City Island, on Long Island Sound, it encountered several storms when the wind blew between sixty and seventy miles an hour, and came through without any damage whatever.

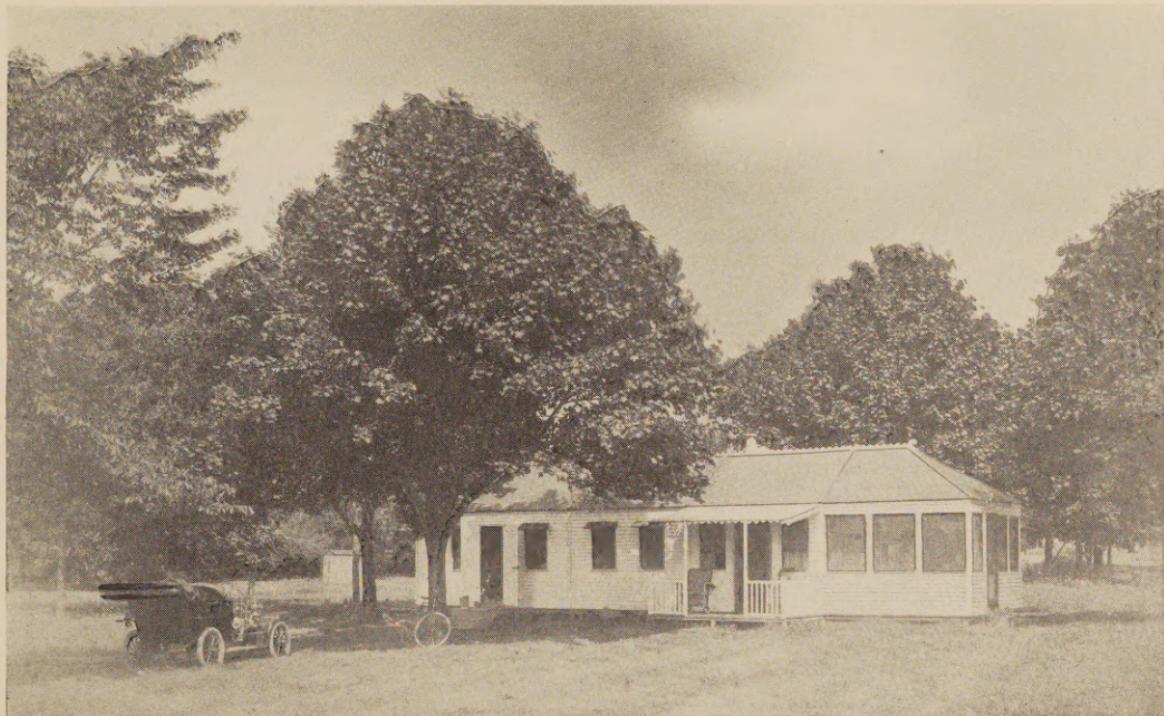

My wife, our year-old baby, and I lived in it from April 26 to December 1, so you can see we gave the house a good trial. Now we want to add another room, and will you kindly advise if there is more than one style of room we can add, also what the cost would be.

GEO. M. HEATHCOTE, 209 East 42nd St., New York City.

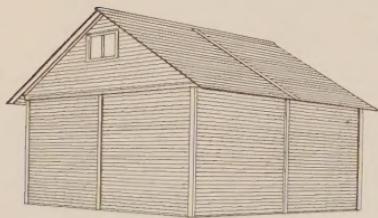

Our Exhibit at the Sportsmen's Show, Madison Square Garden, New York

Hodgson Portable Cottages

A Hodgson Portable Cottage at Garden City, L. I., which has been in use Summer and Winter for many years,
and has always been entirely satisfactory to its owner

How to Figure the Cost of a HODGSON PORTABLE COTTAGE With as Many Large or Small Rooms as Required, With Porches, Ells, Sun Parlors, Etc.

First Unit Without Windows or Doors

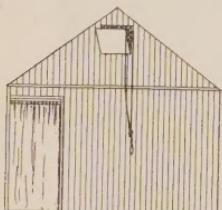

This drawing represents the first unit or room made either 10 ft. wide x 12 ft. long or 12 ft. wide x 12 ft. long. To enlarge the house, it will be necessary in all cases to use this first unit in order to add additional rooms, porches, sun parlors, ell's, etc. You will notice that the drawing shows the sections that are used to make up this unit. Practically all of these sections that form the front, back and sides are 6 ft. wide, there being eight in this first unit. In each one of these sections you can locate one or two windows with or without blinds, or one or two glass or panel doors, or leave the section blank without either windows or doors. Sun parlors are made by putting two sun parlor windows (See page 34) in each 6 ft. section, with the exception of one, which will have a glass door and a window. In the price list in the back of this catalog you will find the price of this first unit in blank, as per drawing, and to this price is added the cost of the windows, blinds and doors you desire, as per price list sheet.

Weight, 10x12 ft., 1400 lbs. Weight, 12x12 ft., 1600 lbs.

ADDITIONAL 6 FT. UNITS This drawing represents an additional unit that is intended to add to the first unit, it being 10 ft. wide x 6 ft. long or 12 ft. wide x 6 ft. long. By removing either the front or the back of the first unit, you can easily key bolt this unit to it and put the front or back, whichever you have removed, onto the end of this new 6 ft. unit. This will make a house or room 10 ft. wide x 18 ft. long or 12 ft. wide x 18 ft. long, and windows or doors can be placed in either of the two side sections if desired. If you wish this room divided into rooms, you can place a partition inside to make one room 10x12 ft., the other

10 x 6 ft., or 12 x 12 ft. and 12 x 6 ft. You will now see it is possible to make the house any length you wish in multiples of 6 ft., by adding these additional 6 ft. units, and by the use of partitions making room 6 ft., 12 ft., 18 ft., etc., in length.

Weight, 6 x 10 ft., 500 lbs. Weight, 6 x 12 ft., 600 lbs.

Partition with Curtain Pole

PARTITIONS These partitions are made either 10 ft. or 12 ft. wide and are used to divide the units into rooms of 6, 12, 18, 24 ft., etc., long. They are figured with an opening, as illustrated, including a curtain pole, but if a door is desired, it is extra. (See price list for inside door.) The opening can come in the centre or either side. There is a ventilator in the gable. (See page 32.)

Weight, 10 ft. wide partition, 125 lbs. Weight, 12 ft. wide partition, 150 lbs.

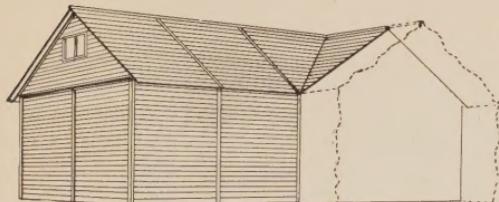

Additional 6 ft. Unit, without Windows, Doors or Partitions

VALLEY ROOF UNIT These are made for either the 10 or 12 ft. wide houses and are used to connect rooms when run in opposite directions. The prices given include the valley roof or turn with the necessary first unit either 10 x 12 or 12 x 12 ft., so that additional 6 ft.

units, porches, ells, etc., can be added as per price list sheet. (See page 24.)

Weight, 10 x 12 ft., 1400 lbs.

Weight, 12 x 12 ft., 1600 lbs.

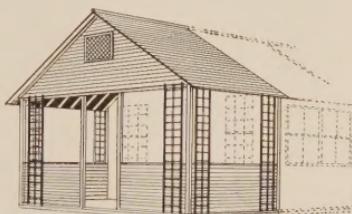

Valley Roof Unit, Without Windows or Doors

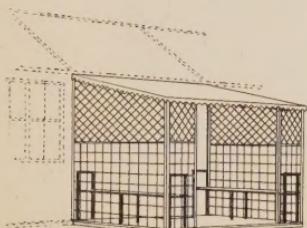

FRONT PORCH UNIT The front porch units are made 6 x 10 or 6 x 12 ft. and are to attach to the end of a cottage. The lattice work improves the appearance and can be bought or not, as desired.

Weight, 6 x 10 ft., 500 lbs.

Weight, 6 x 12 ft., 600 lbs.

Front Porch Unit With Lattice

Side Porch Unit, With Lattice and Seats

LEAN-TO OR ELL UNIT These are made in two sizes, 6 x 6 $\frac{1}{2}$ and 6 x 8 $\frac{1}{2}$ ft. They can be attached to the end or side of a cottage. There is a door on one side and a window opposite. The roof raises for ventilation, and by tacking cloth netting between the roof and sides, it is always insect proof. This ell is used as a kitchen, bath room or closet, and is always found convenient.

Weight, 6 x 6 ft., 450 lbs. Weight, 6 x 8 $\frac{1}{2}$ ft., 550 lbs.

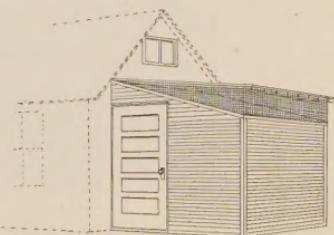

Dormer Window Unit

DORMER WINDOW UNIT These are used for ventilation or to break the lines of a long roof to improve its appearance. (See page 26.) The window is operated by a cord, so that it can be open, as desired.

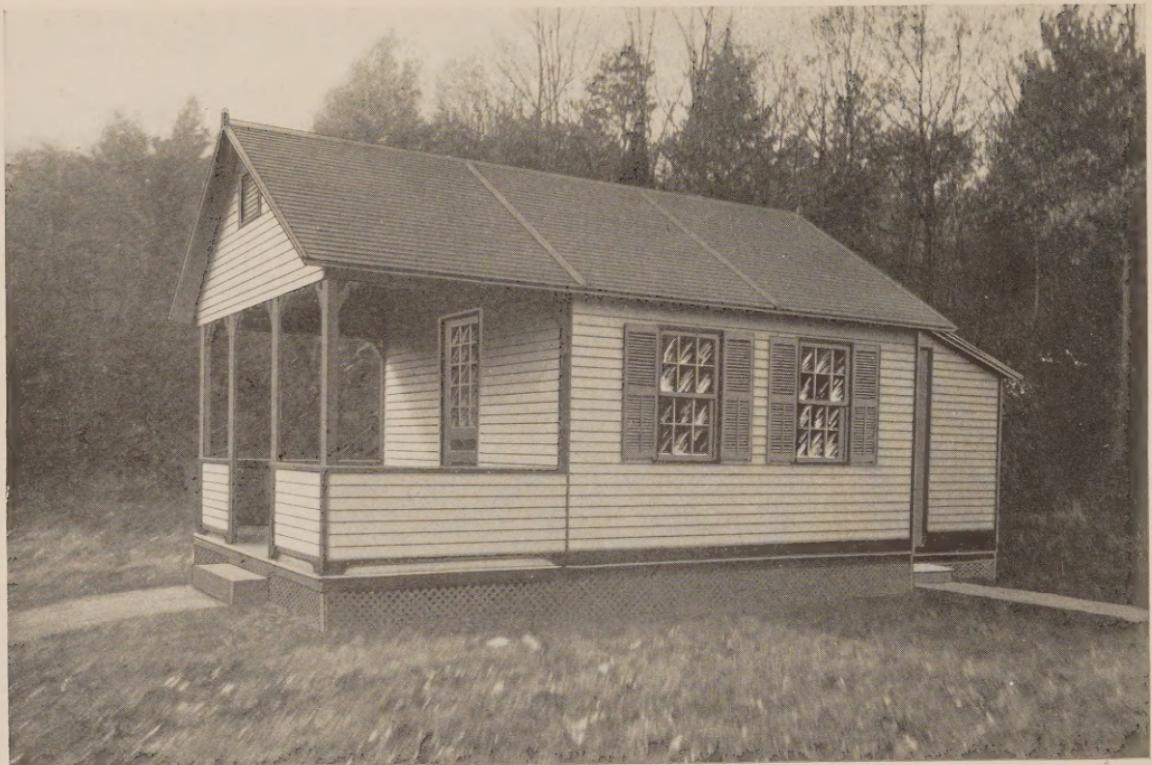

Weight, 100 lbs.

SIDE PORCH UNIT The side porch unit is made 6 x 12 ft. and can be attached to the side or end of any of the cottages. You can have your choice of an awning or wooden roof. The prices are given with and without lattice work and porch seats. (See pages 18 and 26.)

Weight, 6 x 12 ft., 500 lbs.

Lean-To or Ell Unit, With Roof Raised

No. 1301
HODGSON PORTABLE COTTAGE

Hodgson Portable Cottage

No. 1301

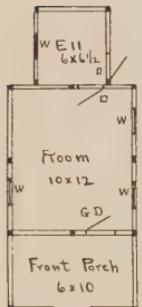

This cottage consists of a Front Porch, a Room either 10 x 12 or 12 x 12 ft. and an Ell which can be used as a kitchenette or bath. It is furnished with doors and windows with blinds, as shown in picture and plans, but if you wish to drop any doors, windows or blinds, the price list in the back of the catalog will give you the prices of these articles, so that you will know what to add or deduct.

The exterior is painted three coats of the very best oil paints. The interior finish is like that shown on page 32. The house has a good hard pine floor and all necessary hardware and plans for erection are furnished. A foundation of posts, cement, brick or stones can be used to set it on.

This house can be easily erected in less than a day by two men of ordinary skill. It is only a matter of bolting a few sections together.

Should you wish to enlarge the house at any time, units can be added as described on pages 6 and 7.

See pages 2 and 3 for description of construction. Cottage furnishings are shown on pages 30 and 31.

Price list in the back of the catalog, No. 1301

No. 1301—Plan A

No. 1302
HODGSON PORTABLE COTTAGE

Hodgson Portable Cottage

No. 1302

This cottage consists of two rooms either 10 x 12 or 12 x 12 ft., with Ell for a kitchenette or bath, and a Front Porch, as shown by plans and illustration. It is furnished with doors and windows with blinds, but if the blinds are not wanted, or more or less doors and windows, the difference in price can be readily figured by referring to the price of these articles as shown in price list in back of catalog.

The exterior is painted three coats of the very best paints and the interior is similar to that shown on page 32.

The Porch can be screened in and furnished with storm curtains, as shown on page 28.

The general make-up and hardware is of the best and everything necessary except the foundation is furnished. The house can be erected on a post, stone, cement or brick foundation by two men of ordinary ability in less than a day, by simply keybolting the few sections together.

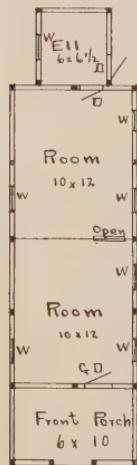

If intended for winter use, either a cellar should be under all or part of the building, or the foundation boarded up outside.

Should you wish to enlarge this house at any time, you can easily do so by adding units as described on page 6 and 7.

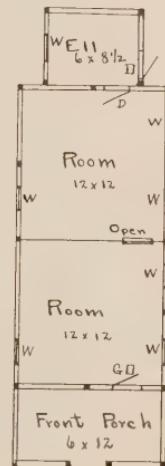

See pages 2 and 3 for general description.

See cottage furnishings on pages 30 and 31.

HODGSON PORTABLE COTTAGE
Located in Marblehead, Mass.

Hodgson Portable Cottage

No. 1303

The plan or arrangement of rooms in this cottage can be varied by simply moving the partition, which can easily be done as explained on pages 6 and 7, to make rooms the width of the house by 6, 12, 18 or 24 feet in length, so if you want to increase the size of the house you can do so at any time.

It is furnished with doors and windows with blinds, as shown by the picture and plans, but if the blinds are not wanted, or more or less doors and windows, the difference in price can be readily figured by referring to the price list in back of catalog.

Our houses all have good hard pine floors. The exterior is painted three coats of the best paint and the interior is similar to that shown on page 32.

The front porch can be screened in and furnished with storm curtains, as shown on page 28, making an excellent sleeping porch.

This cottage is furnished with everything necessary for erection except the foundation, which can be of posts, brick, cement or stone. It can be erected by two men in a day's time by simply key bolting the few sections together.

If intended for winter use, either a cellar should be under a part or whole of the building, or the foundation should be boarded up.

For construction see pages 2 and 3. For cottage furnishings see pages 30 and 31.

Hodgson Portable Cottage

No. 1304

Plans C and D consist of rooms 12 and 6 ft. by either 10 or 12 ft. wide, while A and B have one 18 ft. room, with Porch and Ell units, to which more units can be added at any time, as shown by the details on pages 6 and 7.

It is furnished with a good hard pine floor, with doors and windows with blinds, as shown. If the chimney is wanted, it is extra, as per price list of furnishings. If more or less windows, blinds or doors are wanted, the difference in price can be readily ascertained by consulting the price list in the back of the catalog.

The exterior is painted three coats of the best paint and the interior is similar to that shown on page 32.

The porch can be screened in and furnished with storm curtains, for a sleeping porch, as shown on page 28. A foundation, which is furnished by the owner, can be of posts, brick, stone or cement.

This house is set on posts and boarded up around the foundation, as it is used the year round and is comfortable at all times. It can be easily erected in less than a day's time by two men by simply key bolting the sections together.

For construction see pages 2 and 3. For cottage furnishings see pages 30 and 31.

HODGSON PORTABLE COTTAGE
Located on the North Shore

Hodgson Portable Cottage

No. 1305

The arrangement of rooms can be varied, as shown in the plans and as described on pages 6 and 7, by moving the partition. It is possible to have rooms 6, 12 or 18 ft. long by either 10 or 12 ft. wide.

The floors are of the best grade of hard pine and doors and windows are arranged as per plans. These can be varied more or less, as described on pages 6 and 7. If blinds are wanted, see the price list for the cost of these and add for as many as desired.

By the use of two window sections you can make sun parlor rooms (see page 34).

The exterior is painted three coats of the best paint and the interior is similar to that shown on page 32.

The Front Porch of this house is screened in, as per page 28, but if not required, deduct the amount charged for same, as per price list in back of catalog.

All necessary hardware and simple plans are sent with this house, so that it is possible for two men of ordinary ability, to erect it in less than a day, on a foundation of posts, bricks, or cement by simply key bolting the few sections together. If the house is to be used during the winter there should a cellar under a part or the whole of it, or it should be boarded in about the foundation.

For construction see pages 2 and 3. Cottage furnishings pages 30 and 31.

HODGSON PORTABLE COTTAGE
Used Summer and Winter in Topsfield, Mass.

Hodgson Portable Cottage

No. 1306

The arrangement of the rooms in this cottage can be easily varied by the use of partitions and units, as described on pages 6 and 7. The plans show the use of 12 ft. wide houses, while 10 ft. wide rooms can be used at quite a little reduction, as shown by price list plans B and D.

It has a side porch with stick rails and no lattice or seats.

There are no blinds on this house, but they can be had if desired—see price list sheet in back of catalog for price.

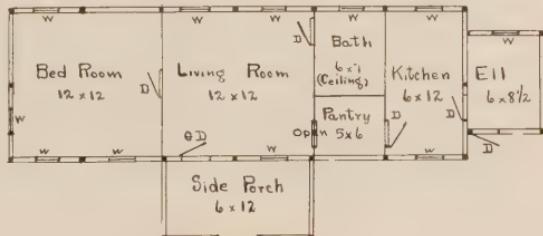

All our houses are furnished with good hard pine floors; the exterior is painted three coats of the best paint, and the interior of this house is similar to that shown on page 32.

The number of doors and windows can be increased or diminished as desired.

We furnish all necessary hardware and plans to erect the house, and it is easily done by two men of ordinary ability in a day's time. The foundation can be posts, cement, brick or stone. This house is set on a cement wall, as it is used throughout the year. If a cellar is under a part or the whole of our houses, and a heater placed in same, they are easily heated in the coldest weather. The chimney shown in this house is extra. For construction see pages 2 and 3. See cottage furnishings on pages 30 and 31.

HODGSON PORTABLE COTTAGE -Used by the Danvers Golf Club, Danvers, Mass.

Hodgson Portable Cottage

No. 1308

The arrangement of the rooms in this cottage can be easily varied by the use of partitions and units, as described on pages 6 and 7.

The sleeping porch shown is similar to our regular side porch except that there are no seats or lattice work, and the sides are clapboarded up two feet, the balance is screened and fitted with canvas storm curtains.

The side porch is as shown in details on pages 6 and 7, and is not figured to include the extra porch and rails, as shown in the picture, but these can be furnished at extra cost if desired.

This cottage has a Dormer window unit, as described on pages 6 and 7, also an opening for a brick or stone fire place. The foundation and all mason work is furnished by owner.

The best grade of hard pine floors is used, and doors and windows with blinds are furnished, as shown, but can be located where desired. Steps and lattice work about foundation are furnished by owner.

If the house is intended for winter use a cellar should be under a part or the whole of it or the foundation boarded up.

The exterior receives three coats of the best paint, and the interior is similar to that shown on page 32.

All necessary hardware and plans are furnished, so that two men of ordinary ability can erect it in less than two days' time, by simply key bolting the sections together. For construction see pages 2 and 3. See cottage furnishings on pages 30 and 31.

HODGSON PORTABLE COTTAGE
Located in Dover, Mass., and used the year around

Hodgson Portable Cottage

No. 1309

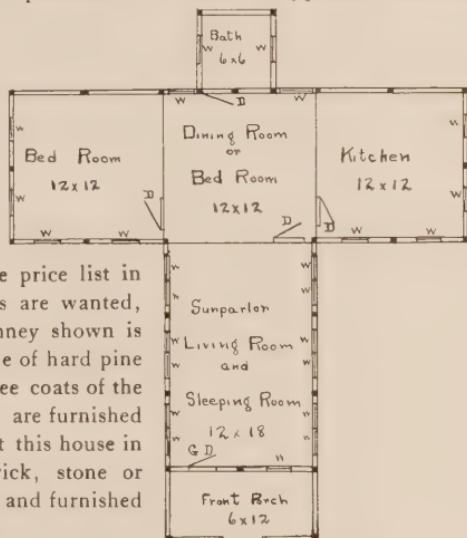

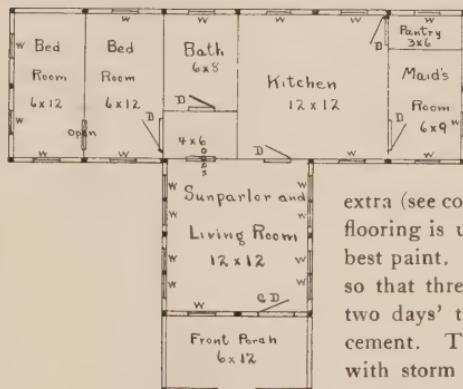

The arrangement of the rooms in this cottage can be easily varied, as shown by the plans and according to details on pages 6 and 7. The feature of this cottage is the use of the Valley Roof unit, making it possible to run rooms in opposite directions, so that it would be an easy matter to add more six foot units, either 10 or 12 ft. wide, with or without partitions, in either direction. This cottage is used the year round and sets on a post foundation and is boarded up. A small cellar is under a part of the building, and with a small furnace the house is easily heated in zero weather. It will be noticed the front room has the two window

sections, making a sun parlor room, but if fewer windows or doors are desired, there would be a reduction in the price, according to the price list in back of the catalog. If blinds are wanted, consult price list. The chimney shown is extra (see cottage furnishings). The best grade of hard pine flooring is used, and the exterior receives three coats of the best paint. All necessary hardware and plans are furnished so that three men of ordinary ability can erect this house in two days' time, on a foundation of posts, brick, stone or cement. The front porch can be screened in and furnished with storm curtains, as shown on page 28.

Construction described on pages 2 and 3.

HODGSON PORTABLE COTTAGE

This House Contains all the Units with some Additional Units (See pages 6 and 7)

Hodgson Portable Cottage

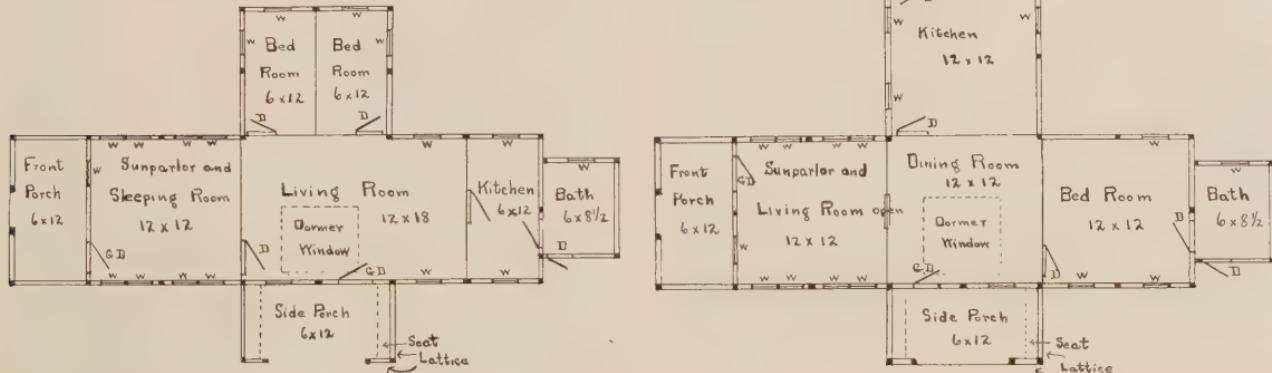

No. 1310

The different units used to make up this cottage are taken from those described on pages 6 and 7. The house includes practically all the different units. The first unit with four additional units and a valley roof unit; a front porch, a side porch, an ell and a Dormer window unit. The valley roof makes it possible to run rooms in the opposite direction, so that additional units can be added to increase its size.

The best grade of hard pine flooring is used and the doors and windows are as shown in the plans, but can be placed where desired. If blinds are wanted they are extra. See price list in back of catalog.

The exterior receives three coats of the best paint, the interior being similar to that shown on page 32.

All necessary hardware and plans are sent, so that three men of ordinary ability can easily erect this house in two days' time. If it is used during the winter, the foundation, which can be of posts, stone, brick or cement, should be boarded in or a cellar put under a part or the whole of the house, in which a small heater should be placed. For construction see pages 2 and 3. See cottage furnishings on pages 30 and 31.

Screened Front Porch

Screens and Storm Curtains for a Front Porch

The Front Porch unit, as shown in many of the cottages, can be screened in and furnished with storm curtains, so that it makes an excellent sleeping porch. The screens are made of frames that are painted and covered with rustless mosquito netting of the best quality, and are easily removed. The screen door has a high grade screen door latch and spring.

The base of these porches is made to run solid to porch floor instead of being cut out as shown in the picture.

The canvas storm curtains cover all the screens and screen door. They can be put inside or out and can be rolled up when not in use. They give ample protection from storms and add much to the comfort of our cottages.

Price list in the back of the catalog, No. 1311

Hodgson Portable Out House, No. 1312

Hodgson Portable Out House No. 1312

This building is a necessity in conjunction with our cottages and bungalows, when it is not possible to have other conveniences.

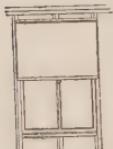

It is a neatly constructed building 4 x 4 x 7 ft. high, and it is fitted with a good panel door with lock and a transom ventilator above. In addition to the ventilator above the door there is a constant circulation of air under the roof, keeping the interior always free from odors—yet weatherproof. It is made of red cedar, and the interior is treated with a sanitary preservative, making it germ-proof.

The exterior is painted like the cottages, and a lattice guard is furnished, as shown.

A seat with a double cover sets over an opening in the floor, and by digging a hole in the ground at this point and filling in with dirt now and then, as necessary, it is possible to have a most desirable and sanitary out house, entirely different from the ordinary kind. When the hole under the house becomes filled up, it is only an hour's work to move the building its width and dig a new hole, thus saving the bother of cleaning out the vault.

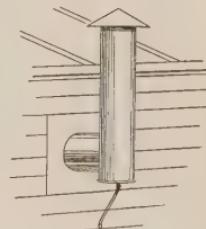

Price list in the back of the catalog, No. 1312

Cottage and Bungalow Furnishings

Shades

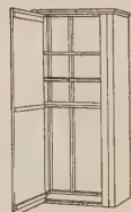

WINDOW SHADES Good quality, dark green window shades to fit our windows. The fixtures can be used to hang in ordinary way, or at the sill, as shown in our Sun Parlor, page 34.

Chimney

SCREEN DOORS Well made and covered with galvanized pearl cloth netting "Rustless." They are all fitted and hinged, and have spring and catch.

WINDOW SCREENS These are made of one frame, to cover the entire window and screwed to the window frame. They are covered with the galvanized pearl cloth netting "Rustless."

Cupboard

Screen Door

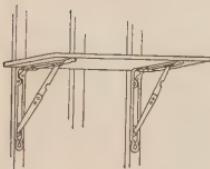

CUPBOARDS These are made to fit into the corner of the room. They are 6 ft. high by 2 to 3 ft. wide, according to location, and have 3 shelves. They pack flat in shipping and are put together with a few screws.

Price list of all these furnishings in the back of the catalog

Cottage and Bungalow Furnishings

Sink

Drop Table

Wood Stoves

SINKS These sinks are built in a box shelf 6 ft. long by 20 in. wide, the sink being 16x20 inches, porcelain lined and fitted with a lead drain pipe and brass coupling. The pipe is cut long enough to extend through the floor. There is a drawer each side of the sink.

DROP WALL TABLES These consist of a neatly made shelf, about 20 in. wide by 36 in. long, and have folding brackets to attach to any wall. The brackets are strong enough to carry a very heavy weight, and when folded they allow the shelf to drop flat against the wall. They can be made in other sizes if desired.

WOOD STOVES for heating and cooking. The oven is 12x19 inches, and the fire-box the same, using long wood. A perfect baker and good heater. It comes complete with pipe and chimney. It is a great comfort in any camp.

FLORENCE AUTOMATIC BLUE FLAME OIL STOVES are by far the best oil stove made and the best and most convenient cook stove for our portable houses. With the Florence oven you can cook better than in the best range.

PORTABLE FIRE PLACE A very desirable and complete open fire place with all necessary pipe and 8 in. galvanized chimney, placed where desired. For burning wood.

Price list of all these furnishings in the back of the catalog

Florence Automatic Blue
Flame Oil Stove

Portable Fire Place

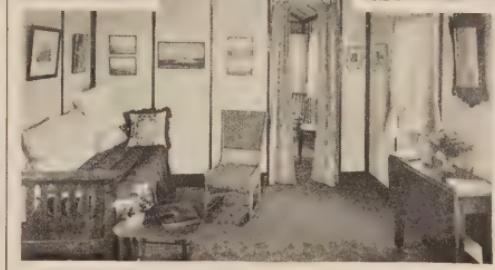

This picture shows a pleasing interior of a Hodgson Portable Cottage, a Room 12x18 ft., made up of three 6 ft. Units

Interior of a
Hodgson
Portable
Cottage
lined with wall
board

Kitchen, looking into ell, which
is used as a butler's pantry.
Our cupboard used as
a china closet.

Living Room

Kitchen, looking into Living Room.
Notice our Drop Table—also
opening in partition
with drapery.

Interior of a Hodgson Portable Sun Parlor
Notice the adjustment of windows, giving plenty of fresh air and sunshine, making excellent sleeping and living rooms

A 6 x 12 ft. Kitchen, made by using a 6 ft. Unit

A Six Foot Unit as a Kitchen

It is surprising how roomy and convenient a 6 x 10 or 6 x 12 ft. room can be arranged for a kitchen. Some of the plans of our cottages show this size room for a kitchen, and at any time they can be arranged so that a ceiling can come over an adjoining room, making an excellent storage place.

In this room is shown a three-burner Florence-Automatic Oil Stove and a sink with a shelf, as listed on page 31. One of these most perfect oil stoves makes life worth living when cooking on a hot summer day.

In this room there is a cupboard, which has many shelves that are not shown.

Many of our cottages are located where it is possible to have town water, and are fitted with a complete line of plumbing by their owners.

An Ell Unit as a Bath Room

Ell Used as a Bath Room

In many of our cottages and bungalows is shown the Ell unit that is used for kitchenette, butler's pantry, bath room, etc.

It is surprising how complete a kitchenette this ell unit will make, with one of our sinks, an oil or wood stove and a metal chimney. The roof is made to raise to give unlimited ventilation, and can be protected from flies, etc., by tacking cloth netting about the opening between the sides and roof.

As a bath room it is ample for all occasions, roomy, well ventilated and sanitary. A local plumber can put in the necessary fixtures for very little money. We do not furnish such fixtures.

Hodgson Portable Bungalows

A HODGSON PORTABLE BUNGALOW AND GARAGE
Located in Peterboro, N. H.

**Winter's Experience
at Moosehead Lake, Me.**

Last winter I spent two weeks of February in the Maine woods in my Hodgson Portable Houses when the thermometer would drop *thirty* degrees below zero at times. In the centre room of the house there was an open Franklin stove which heated the two bedrooms. The ell room at the end of the house had the stove which came with the portable house, and it made the little room into a most luxurious bathroom. The snow drifted into great white

CORNELIA L. NELSON (*Mrs. Thos. Nelson, Jr.*)
Bishop Place, New Brunswick, N. J.

banks as high as the window. We could not go three feet from our door without snow-shoes, and the path leading to our other Hodgson house was cut through pure white walls of snow six feet high.

In the highest winds there was no rocking or jar to the little portable house, and never a leak or sagging of the roof with its heavy weight of snow.

All I could say in favor of your portable houses would only half express the pleasure I take in using them.

Hodgson Portable Bungalows

When something larger and more pretentious is desired than our cottages, the bungalows described in the following pages will fill that want. They can be made any size and plan to suit your requirements and the location. They are, however, all 18 ft. wide and made in multiples of 6 ft. in length. The partitions can be placed to divide the rooms into any size, and they either go to the top of the roof or the rooms have ceilings 9 ft. high, excepting of course the ells.

The porches are wider than on the cottages and the ells can be made 6 or 8 ft. deep by almost any length, the same as the porch.

The windows all have blinds; the doors can either swing or roll; and the floors are the best grade of hard pine.

Our bungalows make year-round homes that are comfortable during the coldest weather, and many of them have cellars with a furnace, electric lights, plumbing, and stone or brick fireplaces.

The exterior receives three coats of the best paint, the interior woodwork is stained and with a background of the rich red waterproof fibre, it is extremely attractive.

If you wish changes in any of the plans, write us giving us a rough plan of what you want and we will try to plan a bungalow to meet your requirements.

The construction is described on pages 2 and 3. Cottage furnishings on pages 30 and 31.

Price list in the back of the catalog

No. 1313
HODGSON PORTABLE BUNGALOW

Hodgson Portable Bungalow

No. 1313

This bungalow is neat in appearance, the roof covering the entire house. The living room is open to the top of the roof—some 16 ft., while all other rooms have ceilings about 9 ft. from the floor. There are blinds to all windows. The floors are the best grade of hard pine and all doors have locks or bolts.

The exterior receives three coats of the best paint, and the interior woodwork is stained. The plan can be changed by adding more 6 ft. sections.

The back porch in this plan can be enclosed to use as a bath room at no extra cost.

All necessary hardware and plans for erection are sent, so that three men can erect this bungalow in two days' time on a foundation of posts, stone, brick or cement.

The bungalow is cool and comfortable in summer and very easily heated in winter.
See general description page 39. See pages 30 and 31 for furnishings.

No. 1313

AT MARBLEHEAD NECK, MASS.

The Portable Bungalow which you furnished me has certainly proved a great success. We have passed five summers in it and even in the heaviest storms it has kept perfectly tight and dry—which is more than can be said of many more permanent structures.

Price list in the back of the catalog, No. 1313

No. 1314

HODGSON PORTABLE BUNGALOW—Notice Gable Windows for Ventilation

Hodgson Portable Bungalow

No. 1314

This bungalow has a gable roof, which is less expensive than a hip roof and which is very practical because of the ventilators in the gable. The plan is convenient but can be enlarged by adding sections, or the rooms made larger by dropping partitions.

The floors are of the best grade of hard pine, and the doors, and windows with blinds are placed as shown in the plan.

The living room is open to the top of the roof—some 16 ft., while all other rooms have ceilings about 9 ft. high.

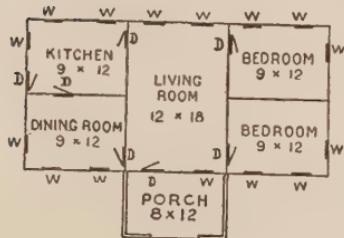

The exterior receives three coats of the best paint and the interior woodwork is stained.

It is cool and comfortable in summer and can be easily heated in winter.

All necessary hardware and plans for the erection are sent, so that three men erect this bungalow in two or three days' time by simply key bolting the sections together.

A foundation of posts, stone, brick or cement is generally used.

For general description see page 39. Furnishings on pages 30 and 31.

No. 1314

Price list in the back of the catalog, No. 1314

No. 1315
HODGSON PORTABLE BUNGALOW

Hodgson Portable Bungalow

No. 1315

This bungalow has a hip roof but should a gable roof be desired there would be a reduction in price.

You can have your choice of porch rails, the same as the stick variety shown in the picture, or the clapboard as shown on page 58. The plan can be changed by adding more sections or a different arrangement of partitions.

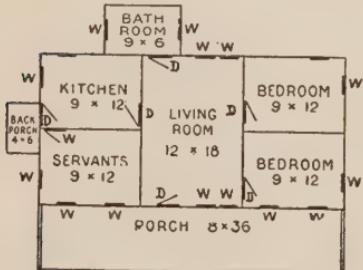

The living room is open to the roof, while all other rooms have ceilings. Doors, windows with blinds are furnished as shown in plan.

The exterior receives three coats of the best paint, the interior woodwork is stained.

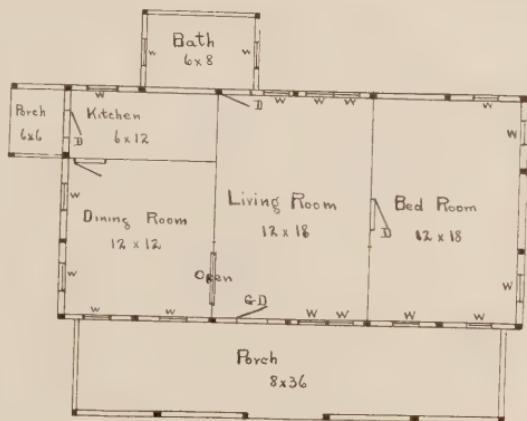

All necessary hardware and plans are sent, so that three men can erect this building in three days' time on a foundation of posts, stone, brick or cement.

It is cool and comfortable in summer, and if intended for winter use the foundation should either be boarded up or there should be a cellar under the whole or part of the building, and if a heater is placed in same it is very easily heated in zero weather.

For general description see page 39. Furnishings pages 30 and 31.

HODGSON PORTABLE BUNGALOW—Located in Andover, Mass.

Hodgson Portable Bungalow

No. 1316

This gable roof bungalow is very attractive and has a very practical arrangement of rooms. The living room is open to the top of the roof—some 16 ft., while all other rooms have ceilings about 9 ft. high. The ells can be used as kitchenettes or bath rooms. All doors, windows and blinds are included as shown in the plan. The exterior receives three coats of the best paint and the interior woodwork is stained, and the floor is the best grade of hard pine. Many people have a mason put in a brick or stone chimney.

Our metal chimney, as described on pages 30 and 31, can be used.

All necessary hardware and plans for erection are furnished, so that three men of ordinary ability can easily erect this bungalow in three days. A foundation of posts, stone, brick or cement is used, making a practical year-around house.

See page 39 for general description.

No. 1319

HODGSON PORTABLE BUNGALOW

Placed in an exposed location and has been used by the owner the year around for many years

Fieldstone Fireplace Built by Owner

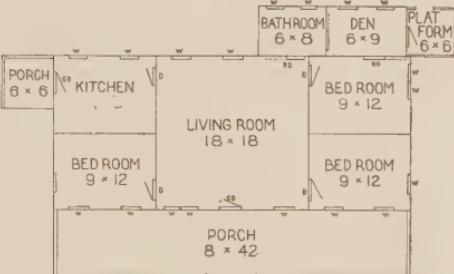

Hodgson Portable Bungalow No. 1319

This bungalow has been used the year round in a very exposed location for some six or eight years. There is a cellar under one end, while the balance of the foundation is boarded up. With a small furnace it has been kept comfortable in the coldest weather with very little fuel.

A beautiful fieldstone fireplace was built in the house by the owner, as shown in the picture.

The price includes all doors, windows and blinds, as shown in the plan, but not the foundation, steps or lattice work, which would vary according to the grade of the ground.

Denman Thompson's Cottage and Garage
at West Swanzy, N. H.

"I cannot say too much in praise of
the Hodgson cottage and garage."

DENMAN THOMPSON,
"Josh Whitcomb."

Royal National Mission to Deep Sea Fishermen — Labrador Branch

(Three Years' Experience in Newfoundland)

St. Anthony, Newfoundland, Oct. 26, 1912.

"We found the portable house which you supplied us with in 1909 extremely practical for this Northern climate. It has been used by us as a house for Reindeer Herders ever since its installation and is still being used."

Yours sincerely,

W. T. GRENFELL, M. D.

Hodgson Portable Garages

HODGSON PORTABLE GARAGE

This Garage is located near New York City. It was built eight years ago, and has given owner entire satisfaction

Hodgson Portable Garages Construction

These garages, which have been on the market ever since the automobile came into existence, have proven to be extremely satisfactory. They are constructed as described on pages 2 and 3. They have good hard pine floors that will stand up under the heaviest cars, with windows, blinds, doors, incline, etc., as specified. However, you can drop any of the windows or blinds

having blank sections (you will notice they are made in sections of 6 ft.) and the price will be reduced as per price list sheet in the back of the catalog.

The combination of our special red cedar rabbeted boarding, lined with the waterproof fibre, makes a construction that is extremely durable and a building easily heated in zero weather. (See general construction on pages 2 and 3.) Our garages are all thoroughly painted three coats of the best paint, are artistic in design and finish and add to the attractiveness of any estate.

They are easily erected by two men of ordinary ability in a few hours' time, by simply key bolting the few sections together.

We send all necessary hardware and plans for erection. The foundation can be of posts, stone, brick or cement. If you prefer a cement floor, we will allow you for the wooden floor, (see price list in the back of catalog) and send a plan for making the cement floor.

Further information will be cheerfully given.

Hodgson Portable Houses at the New England Fair, Worcester, Mass.

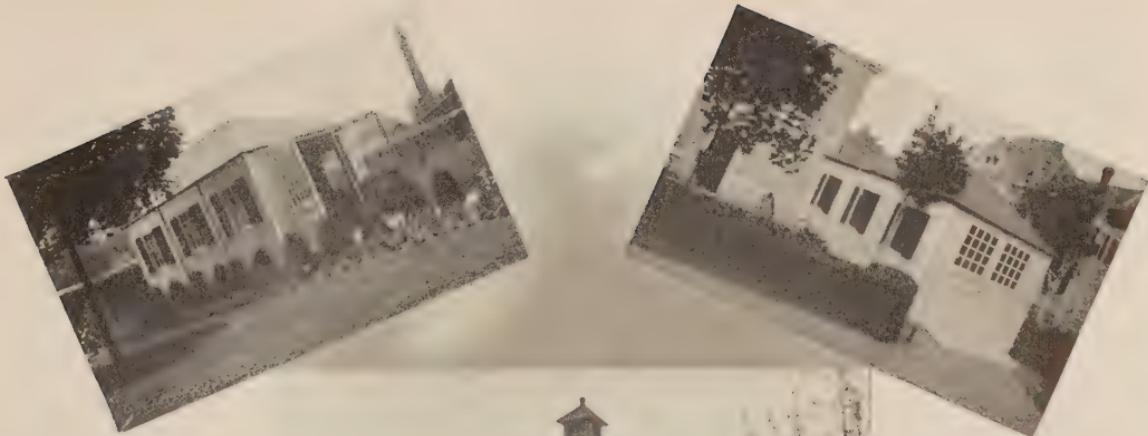

Worcester Telegram said—“The village of portable cottages is one of the prettiest sights one would want to look upon. This village attracted more people than did anything else on the grounds.”

Worcester Post

(Clipping at the time of the
New England Fair)

“One exhibit which has added much to the attractiveness of the grounds is the village of portable houses exhibited by E. F. Hodgson, Dover, Mass. There are five houses in the village including three dwelling houses, a screen house and an automobile garage. The buildings are tastefully arranged and with the setting of plants and shrubs makes one of the finest exhibits ever shown at a New England Fair.”

W. & A. Bacon

Washington and Ruggles Sts.
Boston, Mass.

"At the end of the fifth season I am more than pleased that I bought one of your portable garages, when I saw how easily you increased the size by simply adding another section. This addition, which was effected so quickly and at such a comparatively small cost, would have been practically impossible with any other kind of a building, and shows the advantage of a 'Hodgson Portable Garage.'

"I am always pleased to recommend your houses as being well made and satisfactory in every way."

HORACE BACON.

Cambridge, Mass.

"The portable garage I bought of you has in every way come up to my expectations." JOHN ALLYN.

York Harbor, Me.

"I am enclosing photograph of the portable garage which we purchased of you last year. This is the second year we have used it at York Harbor, and we find it perfectly satisfactory." W. VANDERPOOL,

800 Broad St.,
Newark, N. J.

Interior Fittings for Garages

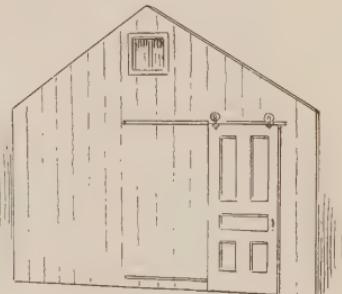

No. 1339 $\frac{1}{2}$

Two Closets and Work Bench

Interior fittings can be added to any of our garages. These include two closets with three shelves each, a 2-inch pine plank work bench, and two robe racks that can be attached to the side walls.

These fittings add greatly to the utility of our garages and are found to be very convenient.

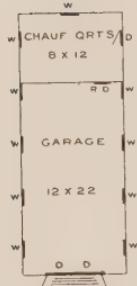

Garage Partition

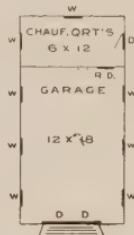

Chauffeur's Quarters

A 12 ft. partition, with a sliding door that can be used in either our gable or hip roof 12 ft. wide garages to divide the garage into separate chauffeur's and garage quarters. These garages can be made any length in multiples of 6 ft., so that any size chauffeur's quarters can be easily arranged. Generally a side door takes the place of a window in these quarters, so that it is possible to go outside without going through the garage room.

These two plans will give the reader some idea of how the above partitions can be arranged to form chauffeur's quarters. If these quarters are desired larger, simply add 6 feet more to the building.

12 x 30 ft. Garage

12 x 24 ft. Garage

Price list in the back of the catalog, No. 1339 $\frac{1}{2}$

Hodgson Portable Screened Houses and Sun Parlors

For Recreation, Sleeping Rooms, Hospitals,
Fresh Air Schools, etc.

No. 1340

HODGSON PORTABLE SCREENED HOUSE—Size 10 x 12 ft.
Made in several sizes (See following pages)

Hodgson Portable Screened House

No. 1340

Our screened houses are made like our cottages, of red cedar, and will last a lifetime. A full description of the construction is given on pages 2 and 3. They have good hard pine floors, rustless screens and screen door, and are painted three coats on the outside. They are made in 6 ft. units, so that they can be made any length in multiples of 6 ft. and either 10 or 12 ft. wide. We furnish storm curtains, if desired, as described on page 86, which give protection from storms, also make excellent sleeping rooms.

Whether placed near a river, lake, in the wood, or on your lawn, they are a source of constant pleasure and comfort. They are invaluable for a baby to sleep and play in during the day. The more the child is kept out of doors the healthier he becomes, and when in one of these screened houses, you can rest assured that the baby is safe and protected from all harm, yet practically living in the open air.

Hodgson Portable Screened House, No. 1340

Sizes	Sizes
Plan A, 10 x 12 ft.	Plan C, 12 x 12 ft.
Plan B, 10 x 18 ft.	Plan D, 12 x 18 ft.

For construction see pages 2 and 3.

The above sizes can be increased at any time by simply adding 6 ft. units.

Price list in the back of the catalog, No. 1340

Storm Curtains Rolled Up

Storm Curtains No. 1341 $\frac{1}{2}$

These pictures show the storm curtains up and down. They can be placed on the inside or out. They are made of a good quality of khaki. They simply roll, being held up by straps, and held down with line cleats, all fixtures going with each set of curtains.

The prices of the storm curtains for the different houses will be found in the price list sheet in the back of the catalog, No. 1341 $\frac{1}{2}$.

Hodgson Portable Screened House—No. 1341

This screened house is similar to No. 1340 except that it has a hip roof instead of a gable roof, and the description of No. 1340 on page 85 applies to this house.

SIZES

Plan A, 10 x 12 ft.
Plan B, 10 x 18 ft.

SIZES

HODGSON PORTABLE SCREENED HOUSE
Size 10 x 36 ft. Plan A (Described on following page)

Hodgson Portable Screened House

No. 1342

For Hospitals

During the past few years extensive investigations have brought out alarming reports of the vast number of people who have tuberculosis.

Many hospitals have their sleeping porches or sun parlors, but in many cases a screened house, as shown here, has advantages over any porch or room connected with the main buildings. It is constructed in a durable and artistic manner, so that it looks well in any location. The construction is as described on pages 2 and 3, being made of red cedar and lined with a heavy non-absorbent fibre that is washable and odorless, making a most sanitary interior. It has a good hard pine floor.

The exterior is painted three coats and the house is furnished with rustless screens, screen door and storm curtains.

All necessary hardware and plans are sent for the erection, which can be done by two men in a day's time, by simply key bolting the few sections together. The foundation can be of posts, stone, brick or cement.

We give two sizes, but it can be made larger or smaller by adding or taking away the 6 ft. units, as it will be noticed by the picture on page 88, that the building is divided into units. The sections of these units contain two screens each, but can be made solid at no extra cost, which is desirable at times in some locations.

Size, Plan A, 10x36 ft.

Size, Plan B, 12x36 ft.

Price list in the back of the catalog, No. 1342

As Used For Adults

As Used For Infants

One of our many Screened Houses and cottage combinations used by the Health Dept. in the City of New York.
Our Screened Rooms and Sun Parlors can be attached to the cottage units, as described on
pages 6 and 7. We can quote prices on any combination you wish. For general
description of screened rooms see page 85.

War Department Depot, Quartermaster's Office, U. S. Army, 263 Summer St., Boston, Mass.

"Mrs. Cruse and myself were very much delighted with the portable house we bought of you, and lived in it for six weeks in New Mexico. I found it very much superior to a tent in every way, and, fixed up as we had it, with electric light and oil stove, we found it was a very comfortable abiding place, even in hot weather. I did not dispose of it when I left New Mexico, but kept it for further use."

THOMAS CRUSE, Lieut. Col. and Deputy Q. M. Gen., U. S. Army.

AFTER NINE YEARS' USE

"The house I bought of you almost nine years ago is in just as good condition to-day as when received. It has been carried several hundred miles at different times, and with the exception of a few new clapboards to replace some damaged in transportation, no repairs whatsoever have been needed. I give the house a coat of paint every two years. It is really my home both summer and winter. I do not believe portable houses can be better built than are yours."

FRANK PRESTON.

Belmont, Mass.

Hodgson Portable Sun Parlors

These sunparlors are similar in construction to our cottages, as described on pages 2 and 3. They are made in 6 ft. units, so can be increased in size at any time, as described on pages 6 and 7.

Each section of the units contains either two sun parlor windows or a glass door and a sun parlor window, or some of the sections can be left blank, as described on page 6, which is desirable in some locations.

The windows give more protection than the storm curtains used in the screened rooms. They open their entire size (see page 34), and when closed are absolutely storm proof. They make ideal year around sun parlors.

For screens and screen doors see page 30.

A Hodgson Sun Parlor in Bermuda, No. 1343

Dowagiac, Mich.

About a year ago I purchased from you a portable sunparlor to use as an outdoor sleeping room. The pictures show the unique location we have given the building. It has proven eminently satisfactory during the time it has been in use and we feel it would be quite a hardship to get along without it now.

A. B. GARDNER.

Hodgson
Sun Parlor used

Porch in
Dowagiac, Mich.
No. 1343

Note How Windows Open Up

Hodgson Portable Sun Parlor, 12 x 12 ft., No. 1343

windows are preferred, as shown in picture, they can be had by paying for four extra windows. (See price list in back of catalog for price of extra windows.) All windows open their entire size, and when closed are absolutely storm proof and practical summer or winter. (For screens and screen doors, see page 30.)

Sizes No. 1343, Hip Roof

Plan A, 10 x 12 ft. Plan C, 12 x 12 ft.
Plan B, 10 x 18 ft. Plan D, 12 x 18 ft.

Sizes No. 1344, Gable Roof

Plan A, 10 x 12 ft. Plan C, 12 x 12 ft.
Plan B, 10 x 18 ft. Plan D, 12 x 18 ft.

Price list in the back of the catalog, Nos. 1343 and 1344

Hodgson Portable Sun Parlor No. 1343

These sun parlors are made in several sizes, and 6 ft. units can be added at any time, as described on pages 6 and 7. There are two styles, a hip and a gable roof, this picture illustrating the hip roof, while the gable roof style is similar to the roof on the screen house on page 84. (See general description, page 91.)

The units, however, are now made up of sections of 6 ft., with two windows or a glass door and a window to a section, so this house would have fifteen windows instead of nineteen, and one glass door; but if nineteen

Portable Houses sent to
Italy after the earthquake. We
were allowed four days to make
this shipment. The order was
given by the National Red
Cross Association of
Washington, D. C.

**Good Government Association,
Boston, Mass.**

I am enclosing a few pictures of some of your portable houses which I had erected in the little town of Ali, some few miles out of Messina, for the refugees from Messina. They were exactly what were needed for this emergency, and my only difficulty arose from the fact that I did not have enough to supply the demand when once they had been seen.

Yours faithfully,
EDMUND BILLINGS

Hodgson Portable Play Houses

There is nothing that gives more happiness to a child and nothing more attractive on any estate than a
Hodgson Portable Play House. Used the year around. (See following pages)

Hodgson Portable Play House

No. 1348

This little play house, having a room 6x7 ft. and a latticed porch 3x6 ft. with seats, is very attractive. It is made like all our portable houses, of the most durable materials, as described on pages 2 and 3, and is practical for use out of doors the year around. It is artistically painted, has a good hard pine floor, casement windows and a French glass door with brass lock and knob.

All necessary hardware and plans are sent to erect the house, which can be set up in a few hours' time by two men. Children, even up to the age of fifteen, thoroughly enjoy keeping house in these little houses, which can be furnished with small size furniture, making them extremely practical. They heat so easily that a small electric heater will make them comfortable in winter at little cost.

Price list in the back of the catalog, No. 1348

Milton, Mass.

"I am glad to tell you that I have always found my portable house satisfactory. Through the terrible heat this summer, and the coldest weather of winter, I have found it successful. Several people have bought your houses on account of seeing mine."

M. B. FORBES.

Hodgson Portable Play House

No. 1349

This play house is similar to the one on page 98, except that the porch sides are clapboarded instead of having lattice work and seats. It is, however, larger, the room being 7x8 ft. and the porch 3x8 ft. It has casement windows and a French glass door with a brass lock and knob. The exterior is neatly painted.

Five Years' Use on Lake Winnepeaukee

"After five years' trial in a location exposed to the extreme winds of Lake Winnepeaukee, we are glad to recommend the portable bungalow which we purchased of you. We have been quite satisfied with it and thank you for your endeavors to please."

50 South St., Boston, Mass.

ALBERT BERNARD.

All necessary hardware and plans for erection are sent, and it can easily be erected by two men, on a post foundation, in a few hours. It will stand up against the severest storms, summer or winter, for many years, and is just as practical for the children to play in on rainy days, as a room in any house.

Price list in the back of the catalog, No. 1349

After 8 Years' Use

"Camp Lotus," South Eliot, Me.

"You may perhaps recall that I purchased two Hodgson houses of you several years ago. They have proved so satisfactory that I am still recommending them."

MRS. BELLE GRAY TAYLOR.

No. 1350

HODGSON PORTABLE SUN PARLOR PLAY HOUSE

Includes a room 10 x 12 ft., with fifteen sun parlor windows (see page 34), a glass door and a porch 6 x 10 ft.
Plan A, Room 10 x 12, Porch 6 x 10. Plan B, Room 12 x 12, Porch 6 x 12.
(For screens see page 30) Price list in back of catalog, No. 1350

Hodgson Portable Play House—No. 1351

This play house is similar to the one shown on page 100, except that it has less windows. It has a glass door in front, a panel door in back and two windows on either side. It is neatly painted and practical for use out of doors at all seasons. Being made of red cedar, it will last for years. The construction is similar to our cottages as described on pages 6 and 7.

All necessary hardware and plans for erection are sent, and it can easily be set up by two men in a half day's time on a foundation of posts, brick, stone or cement.

Plan A, Room 10 x 12 ft., Porch 6 x 10 ft.

Plan B, Room 12 x 12 ft., Porch 6 x 12 ft.

Hodgson Portable Sand House No. 1352

Children will amuse themselves for hours at a time in one of these sand houses, protected from sun and rain by the absolutely tight and durable red cedar roof. They are artistically painted, and set up in a half hour's time.

Plan A, 4 x 4 ft. Plan B, 6 x 6 ft.

Price list in the back of the catalog, Nos. 1351 and 1352

Hodgson Portable Play House

No. 1353

Hodgson Portable Play House, No. 1353

This Play House consists of a large room with four casement windows, a Dutch glass door in back, a French glass door in front, and a porch with lattice work and seats.

For construction see pages 2 and 3.

It is neatly painted and easily erected by two men in a half day's time.

Plan A, Room 10 x 12 ft., Porch 6 x 10 ft.

Plan B, Room 12 x 12 ft., Porch 6 x 12 ft.

No. 1354
HODGSON PORTABLE PLAY HOUSE

Includes a Porch, a Living Room and a Kitchenette similar to description on page 105.
Plan A, Room 10 x 12 ft., Porch 6 x 10 ft., Kitchenette, 6 x 6½ ft. Plan B, Room 12 x 12 ft., Porch 6 x 12 ft., Kitchenette 6 x 8½ ft.
Price list in back of catalog, No. 1354

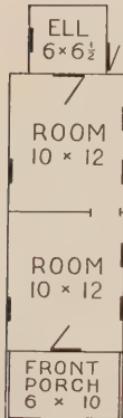

No. 1355

HODGSON PORTABLE PLAY HOUSE

A very attractive Play House, located in Greenwich, Conn. (See description on following page)

Hodgson Portable Play House

No. 1355

No. 1355—Plan A

Play house No. 1355 has two large rooms, a kitchenette and a porch, as shown by the plans.

With the exception of the porch, which is a hip roof style, this cottage is made up of cottage units, as described on pages 6 and 7. It includes windows with blinds, doors, etc., as shown by the plans.

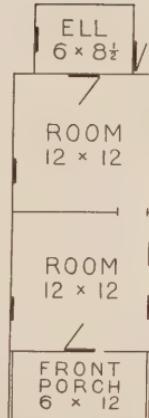

The exterior is painted three coats, the interior similar to illustration on page 32.

All necessary hardware and plans for erecting are sent, so that it is possible for two men of ordinary ability to set this house up in a day's time on posts, stone, brick or cement.

The construction of this house is described on pages 2 and 3.

Cottage furnishings on pages 30 and 31.

Price list in the back of the catalog, No. 1355

No. 1355 Plan B

LEXINGTON, MASS.

"The portable Automobile house which you erected for me last year I find very satisfactory. It is particularly satisfactory to me because of its quick erection, and one of my neighbors referred to it as 'the miracle house,' as it was made so quickly."

EDWIN A. BAYLEY,
30 Central St., Boston.

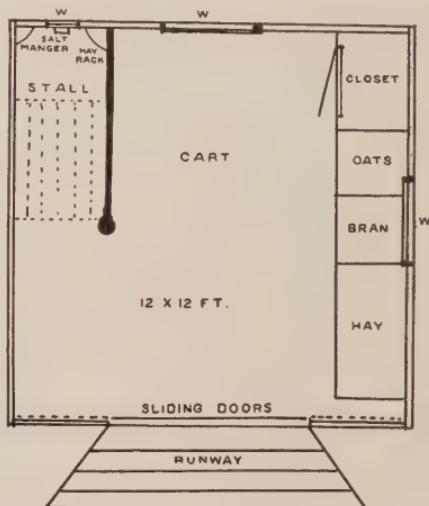

The interior sheathing is stained with a sanitary preservative. It has a good hard pine floor. All necessary hardware and plans for erection are sent, so that two men can easily erect it in a day's time. It is double the pleasure to a child to have his own stable.

Size, 12 x 12 ft. Other sizes to order.

Price list in the back of the catalog, No. 1356

Hodgson Portable Pony Stable No. 1356

This Pony Stable is complete in every detail. There is a stall furnished with a manger, salt and hay racks. It has a closet, grain and hay bins, as shown in the plan.

Plan Pony Stable

Hodgson Portable Garden Seat

No. 1357

An ideal Garden Seat or Tea Room, which adds to the attractiveness of any surroundings. It is furnished with a good hard pine floor, latticed sides and gables, solid back, a very artistic seat, and two flower boxes. It has a durable roof, giving protection from sun and rain, and is well painted. It is far more artistic and useful than the old fashioned summer house.

Size, 6 x 6 ft.

*Price list in the back
of catalog, No. 1357*

Front View

Rear View

30 Kilby St., Boston, Mass., Oct. 16, 1905.

"In answer to your letter in regard to the cottages bought of you in 1901, and located at Nantasket Beach, they are still in commission and have doubly paid for themselves since I purchased them, and are still good for several years more of service. To any person wanting cottages of that class, I heartily recommend your design and workmanship."

H. C. HILL.

Nantasket Beach, Mass., March 13, 1912.

"Will you kindly send me another Sargent & Co. key for the portable cottage I bought from you six years ago? I bought one of your small cottages from Mr. Hill Jan. 15, 1908, a second-hand one, which he bought from you in 1901. This is as good as ever, and it has had no repairing done to it."

MRS. M. S. BURNESS.

527 Fifth Ave., New York City.

"The portable house purchased of you has proved a source of great delight and joy to my children, and is in every way satisfactory."

R. A. RAINY.

Philadelphia, Pa.

"I am immensely pleased with the portable house purchased of you. It is a source of never ending joy to my two daughters, and about half the time they live in the house and have had a number of house parties in it, when they do their own cooking and housekeeping. (See picture.)

Louis J. KOLB, Cor. 10th and Reed Sts.

15 Congress St., Boston, Mass.

"The portable house I got from you is very satisfactory in every way; and also exceedingly attractive in appearance."

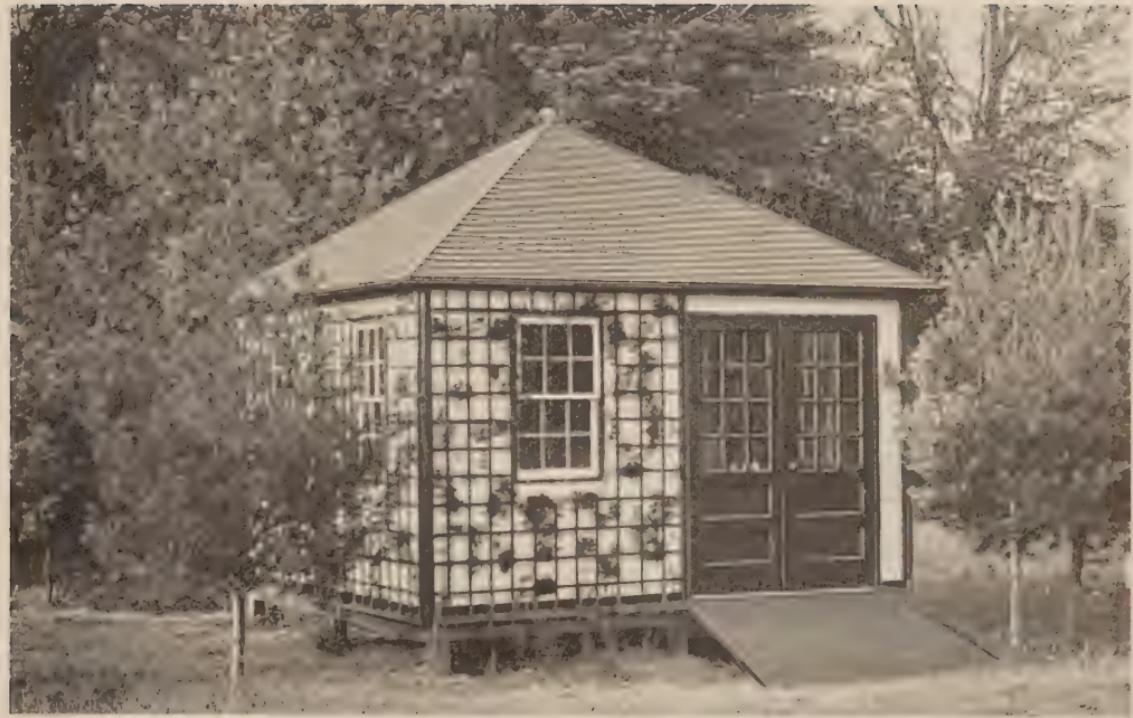

E. W. GREW.

Easthampton, L. I., N. Y.

"Our portable house is a great success in every way. It stood a very hard winter and is in as perfect condition now as the day it came. We have crimson ramblers all over the porch and a miniature formal garden in front, and my little girls are in the house all day long."

MRS. GEO. C. HOLLISTER.

No. 1358

HODGSON PORTABLE GARDEN TOOL HOUSE—Size 12 x 12 ft.

An artistic Garden House, with lattice, five windows and glass doors, hard pine floor and incline. Interior fitted with two closets and bench (see page 82). Made up of red cedar, painted three coats. Can be set up in a few hours' time. Price list in back of catalog, No. 1358

Hodgson Portable Garden Tool House

No. 1359

We have sold many of these houses for Work Shops, Pump Houses, Storage Houses, Grain Houses, Kitchens and Sleeping Rooms in Camps, Boys' Camps, and for many other purposes. It is

10 x 10 ft. x 8 ft. high. It has a good hard pine floor and a glass door with a mortised lock, with a window opposite the door and two windows on the side, as shown. Above the door is a ventilator. The interior is fitted with a bench, and the sheathing on the side walls is stained. We can furnish a galvanized chimney (see page 31), so that with either a wood or coal stove the building can be easily heated in zero weather. It is made in units, so that the size can be increased by adding additional 10 x 10 ft. units.

All necessary hardware and plans for erection are sent, which can be done by two men or boys in two hours' time, by simply key bolting the few sections together. It is neatly painted, and being made of red cedar, will last for years.

Price list in the back of the catalog, No. 1359

Hodgson Portable Motorcycle House

No. 1360

A neat and convenient shed for storing a motorcycle, gasolene, tools, etc. It is made of matched white pine sides with a durable storm-proof roof of corrugated red cedar. Painted inside and out.

It has a good hard wood floor with a platform in front, two shelves, and a lock for the doors. It can be set upon blocks, bricks or posts, in an hour's time by one man.

Other uses this house can be put to: Storage of the baby carriage, lawn mower, garden tools, and many other articles that should be under lock and key and protected from the weather, yet conveniently located. Size, 8 ft. long, $3\frac{1}{2}$ ft. wide, 5 ft. high (platform, 2 ft. more.)

Price list in the back of the catalog, No. 1360

No. 1361

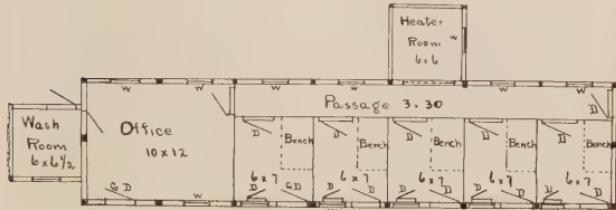

HODGSON PORTABLE KENNEL—Size 54 ft. long x 10 ft. wide.
(See description on next page)

Hodgson Portable Kennel

Nº. 1361

This kennel is made in units of 6 ft., so that it is possible to enlarge it to almost any size. It is complete in every detail and made for use the year around. The heater (which we do not furnish) is located in the heater room with lines of pipe along the back wall. The building is furnished with a good hard pine floor. It has a solid partition between the office and kennels. The partitions between kennels and passageway are made of sheathing and netting with Dutch door or gate leading into each kennel. There are large and small doors, with window above, from each kennel into yard, and a bench is located in each kennel, as shown by plan. The interior side walls are cedar sheathing treated with a sanitary preservative, and the exterior is painted three coats.

All necessary hardware and plans are sent, so that two men can set this kennel up in a day's time on a foundation of posts, stone, brick or cement.

Office or Reception Room

Price list in the back of the catalog, No. 1361

The floor and sides are made of white matched pine and the roof of corrugated red cedar roofing, and all neatly painted. It is well made, durable and attractive in any surroundings.

It is shipped in a few flat sections, and can be put together in a half hour's time by any one.

Price list in the back of the catalog, No. 1362

Hodgson Portable Kennel—No. 1362

This little kennel is for one dog of almost any size. It is well ventilated and easily cleaned, as shown by the pictures. By simply tilting back the house, the floor is exposed for a thorough cleaning.

Raised for Cleaning

Wigwarm Setting Coop—No. 1363

Price list in the back of the catalog, No. 1363

Wigwarm Colony Laying House—No. 1364

Capacity 12 Hens

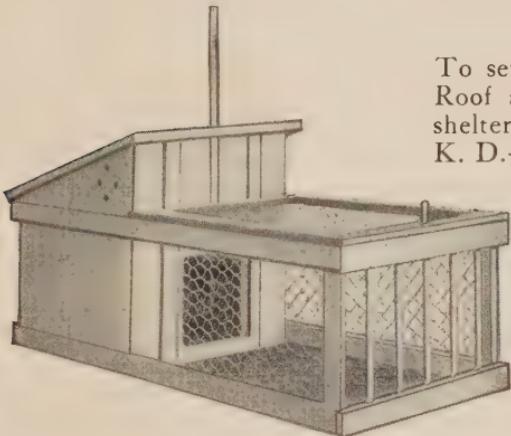

This house is fitted with a raised floor, giving an upper laying and roosting room, which is fitted with a wire and canvas

front, nests and roosts, and a lower scratching shed with a yard 4 x 10 ft., a food hopper and cage fountain. Size 4 x 10 ft., 5 ft. high—weight, 225 lbs. Made of matched white pine with a corrugated red cedar roof, and neatly painted. Capacity 12 hens.

A canvas Storm Cover to protect top and sides of run, \$4.00 extra.

Shipped K. D.—Set up in half hour's time.

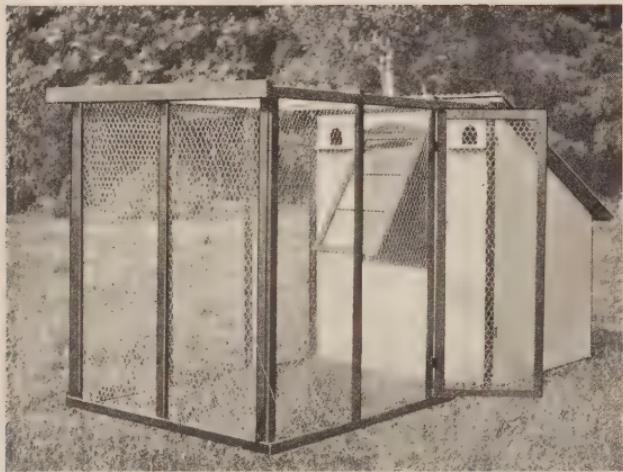

Price list in the back of the catalog, No. 1364

Wigwarm Setting Coop

Wigwarm Colony Laying House, No. 1364

Pigeon House With Cage

Everything for the Poultry Farm

We manufacture many styles of Portable Coops, Poultry Houses, Brooder Houses, etc., to take care of from a dozen hens in your back yard to thousands of hens on an up-to-date poultry farm.

If interested, write for our Poultry Catalog. It will tell you how to make a success of the poultry business.

Hodgson Portable Pigeon House No. 1365

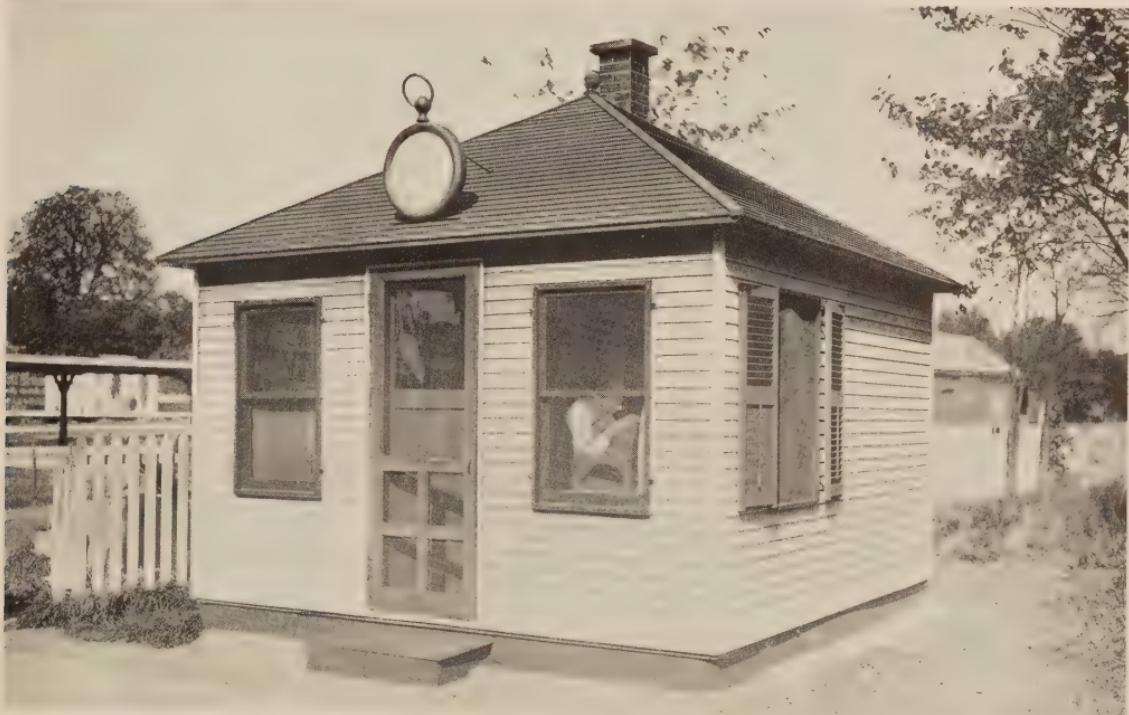

A complete pigeon house, or aviary, with a flight or cage, for five pair of pigeons. It is furnished with nests, perches and fountain. The house is 4 x 4 ft. x 5 ft. high, with a door and glass window in front. The cage is 4x6 ft. with a gate, and is covered with 1 inch netting. The house is made of matched white pine with a corrugated red cedar roof and is neatly painted.

It can be used for many kinds of birds or pet stock.

It is easily set up by any one in an hour's time.

Price list in the back of the catalog, No. 1365

No. 1366

HODGSON PORTABLE OFFICE—Size 12 x 12 ft.

A practical year around office for any business. Can be made any size. Includes four windows, a glass door and a metal chimney. (For construction see pages 2 and 3.) Price list in back of catalog, No. 1366

Harvard Crew at “Red Top”

Over ten years ago the Harvard Crew purchased a Hodgson Portable Cottage for general use at their training quarters at “Red Top.” Some six or seven years later, the crew’s consulting physician advised the use of several of the Hodgson Sun Parlor Fresh Air Cottages for general living and

sleeping quarters for the crew while in training. These were purchased, and the conditions which they created in giving the crew the necessary health, vigor and endurance has enabled Harvard to win the race each successive year from Yale, whose crew has not had the benefit of these excellent conditions.

These houses might help the Yale Crew.

Hodgson Portable Tonic Stand, 10 x 12 ft., No. 1367

Price list in the back of the catalog, No. 1367

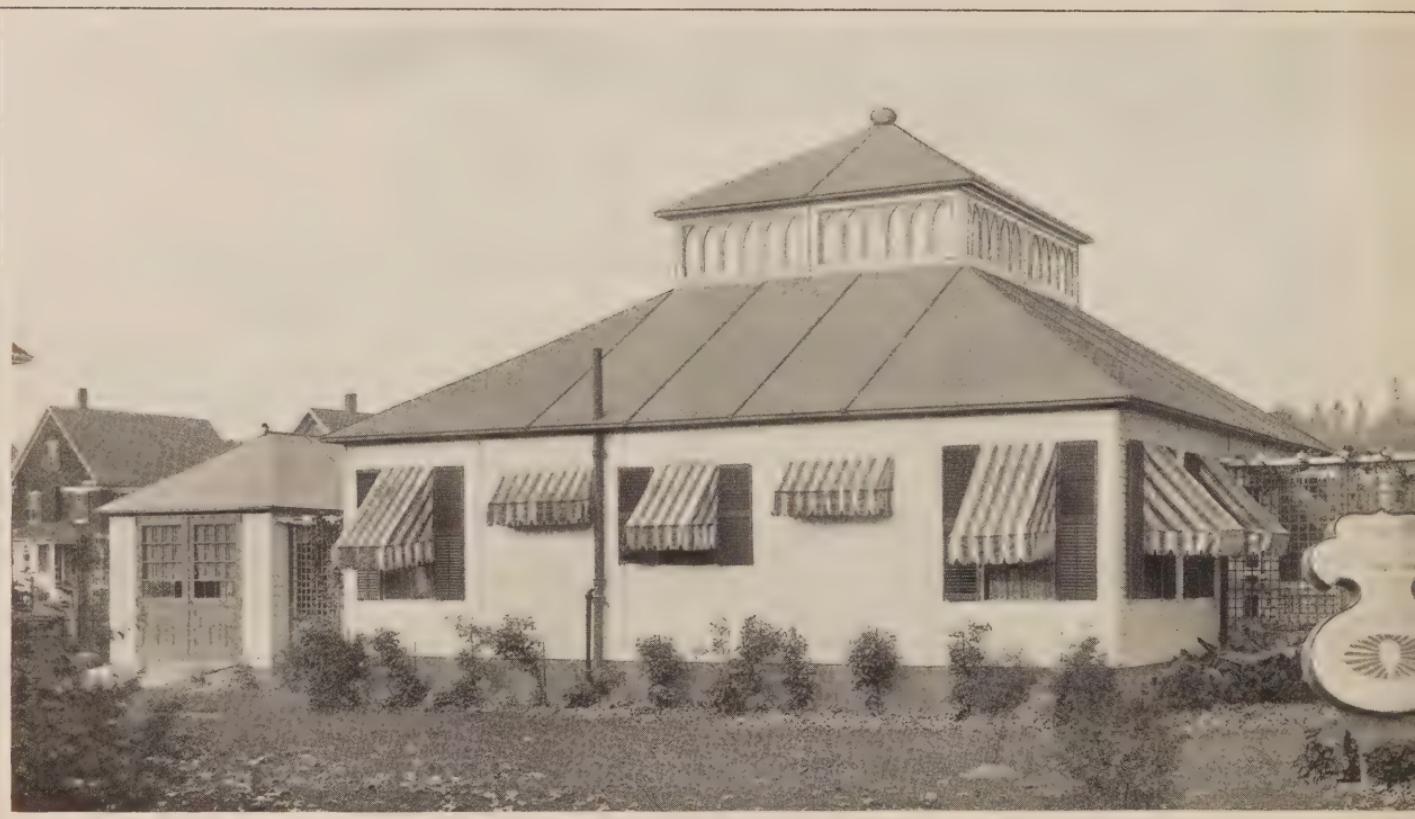

Hodgson Portable Tonic Stands No. 1367

For those wanting something practical, durable and artistic, that will advertise their goods and increase their sales, the Hodgson Portable Stands are unexcelled.

The sun and storm hoods above the openings, as shown in the picture, are so arranged that they close and bolt on the inside, forming a solid board shutter for protection. There is a shelf or counter inside across the front of the building. There is a gable window at either end of the house and a door with a good lock in the rear. The house is constructed of red cedar, well painted, and furnished with a good hard pine floor. It is absolutely storm proof. Size, 10 x 12 ft. Other sizes to order.

The construction is described on pages 2 and 3.

Hodgson Portable Bungalow and Garage

Built for Edison Electric Illuminating Co.

These pictures show a beautiful bungalow, with several interiors, and a garage, which were built for the Edison Electric Illuminating Co. of Boston by the E. F. Hodgson Co. The bungalow is used as a demonstrating house, being moved from town to town and visited by thousands of people each year. It is lighted and heated by electricity and has every conceivable electric appliance that could be used in the household. There are five rooms, each 14 ft. square—a dining room, library, bed room, kitchen, with a living or reception room in the center of the building running up some 25 ft. into a beautiful glass dome. Besides these rooms there is a bath room, a pantry, a laundry and front and back halls.

The garage is a 12 x 18 ft. hip roof style, similar to our No. 1332 garage.

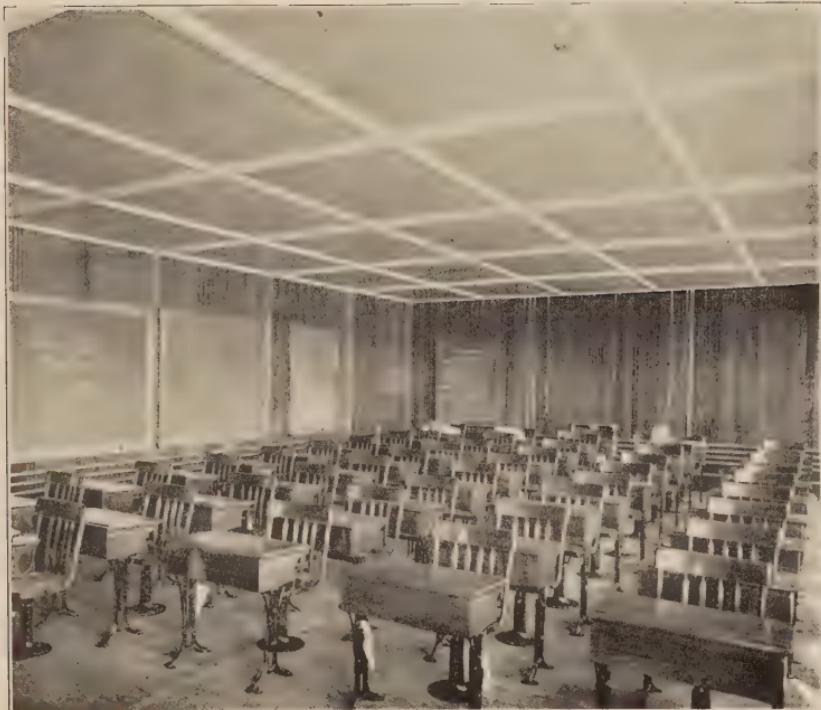

This entire outfit is in active operation the year around, and is open to the public.

HODGSON PORTABLE SCHOOLHOUSE (See description on page 123)

Hodgson Portable Schoolhouse

Interior of a Hodgson Portable School House With Ceiling

Like all the Hodgson Portable Houses, our school buildings are constructed to last. They are practical in a portable way, being inexpensive to move to the overcrowded districts, well lighted by many windows, and perfectly heated and ventilated. They are made of red cedar—the most durable wood that grows—and are neat in appearance, so that they are never objected to when placed in the best residential parts of any city or town.

These are important points that are necessary to make a good portable school house.

Plans, specifications and photographs submitted upon application.

HODGSON PORTABLE GYMNASIUM—Size 22 x 60 ft.

Used the year round by the Y. W. C. A. of New Bedford, Mass. (Description on following page)

Hodgson Portable Houses for Gymnasiums, Dining Rooms, Halls, Churches, Work Shops, or for Any Purpose Where a Large Room is Desired.

These buildings are made 18, 20 and 22 ft. wide by any length in multiples of 6 ft. They can be made in one room or divided into several rooms by partitions. Doors and windows can be located where desired.

Interior of Gymnasium

The walls are 9 ft. high and the room is open into the roof, which is about 16 ft.

They can be easily heated and ventilated in the coldest weather and are inexpensive to set up or take down.

They are made in the most practical manner of red cedar and lined with a heavy waterproof fibre. They have good hard wood floors, panel doors with locks and regular double hung windows. They are well painted and ready to key bolt together, which can be done very easily with help of ordinary ability.

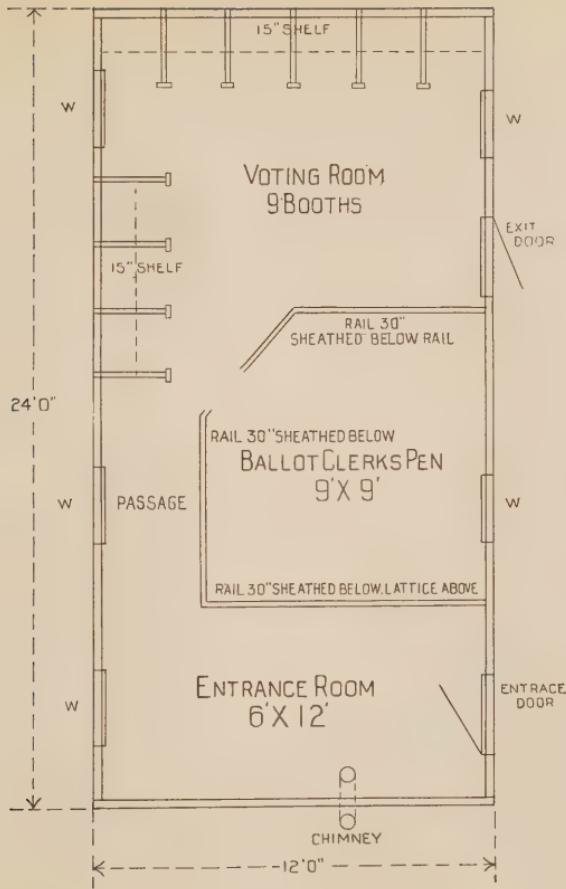

Read pages 2 and 3 for description of construction.

Prices quoted and plans submitted on any size building upon application.

No. 1368

HODGSON PORTABLE VOTING BOOTH, Size 12 x 24 ft.
(See following page for description and plan)

Hodgson Portable Voting Booth No. 1368

This Voting Booth is made in units of 6 ft., so that it can be enlarged at any time to meet all requirements. It is made up in a few sections that are quickly bolted together with key bolts by two men in a few hours' time. The house is made of red cedar, painted three coats, and will last for years.

It has entrance and exit doors, windows that are hinged at base and held by transom chains, with solid board shutters on the outside, to protect the windows. There are two gable windows, clerk's pen and voting booths, as shown in plan. There is also a galvanized iron chimney, so that the building can be easily heated in zero weather. The floors are of hard pine and are in sections, which are generally levelled on blocks. The roof is of red cedar, so constructed that it is always tight no matter how many times it is taken apart.

This is not a cheaply constructed building of sheathing with a paper roof, but is thoroughly well built, durable and so attractive that there will never be any complaints when set up in the best residential districts of any city or town.

Price list in the back of the catalog, No. 1368

THE GUIDE TO NATURE

Sound Beach, Conn.

"The portable cottage makes an attractive appearance. It is occupied by Mrs. Blakely who devotes her time to studying botany in the Arcadia laboratories. She uses it as a permanent home and found it was comfortable even in the coldest weather this last year, and most certainly the winter was a severe test. Frost went as low as 4 ft. in the ground. A large number of houses in Sound Beach had their water supply cut off by freezing, but the cottage was comfortably warm all the time."

EDWARD F. BIGELOW.

Worcester, Mass.

"I have three of your portable houses, which I use as sleeping rooms and a garage. I find the sleeping rooms absolutely water tight, as easy to warm as any house, and not only comfortable, but attractive in appearance. The garage suits every purpose, and I am sure that your portable houses fill a long-felt want."

F. A. EASTON.

WHITE & CASE, 14 Wall St., New York.

"It is with much pleasure we report that the experiment of a portable house of your construction has proved itself far better than we thought possible. By improvising a foundation wall of barn boards and quilted paper, and by installing a small hot water heater, the house has proved absolutely reliable in all the seasons of the year. We use it as a completement to another house, and it is the permanent abode of the nursery governess and two children. An especially pleasing feature about it is its continued tightness against wind and rain. The wood does not seem to shrink, nor to develop cracks or openings, despite its sectional construction. We are going into our third winter with it."

ROBERTS WALKER,
Scarsdale, N. Y.

499 8th St., Brooklyn, N. Y.

"The portable house which we purchased from you last year and which has been located in the Mohawk Valley, has withstood all kinds of weather, including deep snow and violent rain storms, and has given both comfort and satisfaction."

MARSHALL BROWER.

20 Hereford St., Boston, Mass.

"The portable house which I bought of you last year has been absolutely satisfactory, and just as you represented it."

DAVID CHEEVER, M. D.

PRICE LIST

TERMS: The prices quoted are net cash with order, or one-fourth cash and balance sight draft with bill of lading attached. If you wish shipment made without draft, satisfactory bank references will be required. Make all checks or money orders payable to the E. F. Hodgson Co.

SPECIAL NOTICE: The prices used in figuring for doors, windows and blinds in the blank units shown on pages 6 and 7 are given here. These prices also apply where more or less windows, doors or blinds are wanted in any of the houses shown in the catalog.
